

Technology Committee
Meeting Minutes 3/30/10

Present: Denise Cross, Bob Desilets, NT Izuchi, Joan Perry, Ingrid Skadberg, Carol Bosworth, Deb Downen, Louise Hamlin, Ken Dwyer

WWW Policy Vote:

Approved unanimously (Holly Kularski voted yes by proxy)

New Data Center:

Ken updated the committee on the project to consolidate and relocate the campus servers into a data center to be located in 230A. The location was chosen because there are no abutting classrooms and is centrally located for wiring. All servers should be relocated by the end of the summer. The work includes a \$400K electrical upgrade funded by US stimulus funds. The telephone system is scheduled for upgrade next year.

Room 378A renovation:

Renovations aimed at making the current space more usable by making an additional classroom. Access will be through the HCC, not ideal, but necessary. There will also be a small "laptop depot" room carved out for support of the student laptop program. All Comp Sci students will be required to have a laptop. Others may buy in. The laptop depot will assist students with their laptops and send units out to the Worcester State repair program as needed.

Next meeting will be 4/20/10 at 2pm. We hope to begin discussing the copyright policy.
